Rafael Rino

IT Support | Cybersecurity | Networks | Systems Administration

Professional with military experience in operational security and a current focus on cybersecurity, networks, systems administration, infrastructure and technical support.

PROFILE

30-year-old professional from Leiria with experience as a Tactical Operator in the Air Police, involved in security missions, infrastructure protection, joint exercises and operations within the Portuguese Armed Forces. Brings a solid foundation in discipline, responsibility, work under pressure and strict compliance with procedures.

The technical side is focused on IT Support, infrastructure, Cisco networks, virtualization, Windows Server, Active Directory, Linux, network services, monitoring and cybersecurity in academic and business contexts.

PROFESSIONAL EXPERIENCE

IT Internship · Cybersecurity, Networks and Systems

2025 - Present | DRT-Group · Leiria

- Research and development of projects aimed at NIS2 and TISAX certifications.
- Support and assistance with network configurations, network structure implementation and troubleshooting.
- Hardware and software maintenance, user support and technical support in a business environment.
- Support in Windows Server, Active Directory, firewall and infrastructure services administration.
- Exploration of SOC concepts, network architectures, risk mitigation and security event monitoring.
- Development of internal simulations in cybersecurity and support for the internship report.

Tactical Operator · Air Police

June 2017 - June 2024 | Portuguese Air Force · Lisbon

- Participation in security missions and defence of military facilities.
- Security and protection of aircraft, infrastructure and military personnel.
- Execution of operational and protection missions within the Portuguese Armed Forces.
- Support in training new personnel in tactical shooting, self-defence and security procedures.
- Experience working under pressure, coordinating teams and operating in high-responsibility environments.
- Awarded 3 commendations, recognitions granted by senior leadership, including generals and colonels, for high-level performance.
- Received a letter of appreciation for a 4-month operational mission on Porto Santo Island, providing security in coordination with several security forces.
- Participated in a NATO joint mission with armed forces from several countries, in a multinational and coordinated environment.

EDUCATION

TeSP · Cybersecurity and Computer Networks

Higher professional technical training in networks, systems, virtualization, secure services and information security.

Networks | Cloud Computing | Active Directory | Windows Server | Linux | Cisco | VMware | Pentesting

12th grade · Science and Technology

Secondary education completed in Science and Technology.

PROFESSIONAL SUMMARY

Military experience: 7 years
Driving licence: Category B
Current area: Cybersecurity
Technical IT education: 2 years
Languages: PT native · EN C1

- ICCS, Individual Common Core Skills
- Air Police Tactical Operator Course
- Defensive and off-road driving, PSP/UEP
- Cybersecure Citizen, National Cybersecurity Centre
- Expandable Baton Course

ACADEMIC PROJECTS

Systems Administration

Active Directory and Centralized Management

- Installation and configuration of Active Directory Domain Services, domains, OUs, users and groups.
- Management of GPOs for Windows 10 security policies, Windows Defender Firewall and centralized control.
- Configuration of DHCP, DNS, permissions, service accounts and task delegation in a simulated business environment.
- Implementation of monitoring, auditing, event logging and administrative automation with PowerShell.
- Management of virtual machines in VMware and VirtualBox for systems labs.

Secure Network Services

Secure and Virtualized Infrastructure

- Implementation of a virtualized infrastructure for an academic environment, with network segmentation, DMZ and Linux services.
- Administration of Ubuntu Server, firewall and routing with OPNsense, primary/secondary DNS with BIND and Apache with HTTPS.
- Configuration of Postfix, Dovecot, SSH, SSL/TLS, ACLs, backups, logs and secure authentication.
- Monitoring of critical services with Nagios, including DNS, Web, SMTP, POP3, IMAP and HTTPS.
- Application of hardening, access control, brute-force mitigation with Fail2Ban and event analysis.

Networks and Virtualization

Cisco, VMware and Infrastructure Labs

- Configuration of TCP/IP IPv4 and IPv6 networks, VLANs, 802.1Q trunking, Layer 2/3 switching and Inter-VLAN Routing.
- Configuration and monitoring of OSPFv2, static/dynamic routing, gateways, subnets and connectivity troubleshooting.
- Basic administration of Cisco switches and routers, network segmentation, QoS, broadcast domains and NIC Teaming.
- Installation and administration of VMware ESXi, vSphere, vCenter, datastores, snapshots, vSwitch, VMkernel and virtual disks.
- Creation of environments with Type 1 and Type 2 hypervisors, thin/thick provisioning and P2V conversion with VMware Converter.

BUSINESS PROJECTS

Cybersecurity · DRT-Group

Internal Phishing Awareness Campaign

- Creation of a controlled phishing simulation to assess employee awareness of social engineering and fraudulent emails.
- Preparation of a Kali Linux virtual machine, installation and configuration of GoPhish and an Apache server to host the awareness page.
- Development of a web page similar to a Google/Gmail authentication portal, with tracking for email delivery, opens, clicks and simulated credential submissions.

PROFESSIONAL SUMMARY

Military experience: 7 years

Driving licence: Category B

Current area: Cybersecurity

Technical IT education: 2 years

Languages: PT native · EN C1

- Automation of the extraction of names, emails and job roles from internal documentation for import into GoPhish.
- SMTP integration with a dedicated Gmail account and configuration of Microsoft Admin Center rules to allow the campaign in a controlled environment.
- Configuration of an internal Active Directory domain, MKCert certificate, Apache SSL and certificate distribution through GPO.
- Analysis of campaign results through GoPhish, consolidating skills in Linux, Apache, DNS, digital certificates, SMTP, Active Directory, GPO and security monitoring.

Business Pentesting

Security Assessment and Vulnerability Analysis

- Execution of controlled penetration tests to identify vulnerabilities in systems, services and web applications.
- Footprinting, network reconnaissance, service enumeration and asset exposure analysis.
- Use of tools such as Nmap, Nessus, Nikto, DirBuster, Burp Suite and OWASP ZAP in a technical assessment context.
- Risk validation, evidence collection and organization of results by severity and impact.
- Production of a technical report with mitigation recommendations, hardening best practices and remediation priorities.

SOC · DRTMoldes · NIS2

Virtual SOC Lab for Business Implementation

- Development of a home-based SOC lab to assess the feasibility of a future internal implementation at DRTMoldes aligned with NIS2 requirements.
- Implementation of Wazuh as the main SIEM for log centralization, Linux endpoint monitoring, Syscheck, authentication events and operating system event collection.
- Installation and configuration of Suricata as a NIDS, including JSON output in eve.json, Wazuh integration and ET Open rule updates through suricata-update.
- Validation of the infrastructure with Nmap scans, monitored file changes and failed authentication attempts to test detection, correlation and alerts.
- Implementation of TheHive for incident management and creation of a Wazuh integration through a Python script and REST API to send alerts and open cases.
- Implementation of Shuffle as a SOAR platform in Docker, using webhooks and API keys for automation and incident response across security tools.
- Troubleshooting of Suricata rules, platform integrations, Docker containers, OpenSearch port conflicts and Linux service issues.

fancup.net · AWS · Cloudflare

fancup.net cloud infrastructure configuration

- Configuration of the fancup.net AWS infrastructure with Windows Server 2022 servers for the application and database, IIS hosting the application, SQL Server, Elastic IP and Cloudflare.
- Configuration and validation of CloudWatch Agent, CPU/RAM/disk metrics, IIS logs, APP/DB alarms, SNS and the FUNCUP-INFRA dashboard.
- Configuration of AWS Backup, golden AMI creation, EC2 recovery, failover, Load Balancer, Launch Template and Auto Scaling.
- Configuration of HTTPS with Cloudflare Full (Strict), Origin Certificate, IIS 443 binding, HTTP to HTTPS redirect and HSTS.
- Integration and validation of local Ollama with the Gemma model for the AI component, with ChatProvider, local endpoint and functional tests.

TECHNICAL SKILLS

Technical Profiles - SysAdmin, IT Support, infrastructure, advanced helpdesk, Windows Server Administrator and Junior Cybersecurity / Blue Team.

Networks and Infrastructure - TCP/IP, IPv4/IPv6, VLANs, 802.1Q trunking, switching, routing, OSPFv2, segmentation, Cisco and troubleshooting.

PROFESSIONAL SUMMARY

Military experience: 7 years

Driving licence: Category B

Current area: Cybersecurity

Technical IT education: 2 years

Languages: PT native · EN C1

Windows Systems - Windows Server, Active Directory, GPO, DHCP, DNS, permissions, auditing, events, basic PowerShell and firewall.

Linux and Secure Services - Ubuntu Server, Apache, BIND, Postfix, Dovecot, SSH, HTTPS, Fail2Ban, logs, backups, hardening and network services.

Virtualization - VMware ESXi, vSphere, vCenter, Workstation Pro, VirtualBox, Proxmox, snapshots, datastores, vSwitch and P2V.

Cybersecurity - Pentesting, vulnerability analysis, GoPhish, phishing awareness, SOC, risk mitigation, monitoring and auditing.

Tools and Platforms - OPNsense, Nagios, Nmap, Nessus, Nikto, Burp Suite, Microsoft 365 Admin Center and Active Directory.

Programming and Web - HTML5, CSS3, PHP, MySQL, C language, Perl, PowerShell scripts and administrative task automation.

Hardware and Support - Assembly, maintenance, diagnostics, component replacement, user support and technical incident resolution.
