

Rafael Rino

Cybersecurity | Networks | Systems Administration | IT Support

Leiria, Portugal | rino_aug@hotmail.com

Online CV website: <https://rino-66cod.github.io/my-personal-cv/>

Professional with military experience in operational security and a current focus on cybersecurity, networks, systems administration, infrastructure and technical support.

Technical profile focused on IT Support, infrastructure, Cisco networks, virtualization, Windows Server, Active Directory, Linux, network services, monitoring and cybersecurity in academic and business contexts.

PROFILE DETAILS

- Military experience: 7 years
- Driving licence: Category B
- Technical IT education: 2 years
- Languages: Portuguese native, English C1
- Nationality: Portuguese

PROFESSIONAL EXPERIENCE

- **IT Internship - Cybersecurity, Networks and Systems | DRT-Group, Leiria | 2025 - Present**
- Research and development of projects aimed at NIS2 and TISAX certifications.
- Support and assistance with network configurations, network structure implementation and troubleshooting.
- Hardware and software maintenance, user support and technical support in a business environment.
- Support in Windows Server, Active Directory, firewall and infrastructure services administration.
- Exploration of SOC concepts, network architectures, risk mitigation and security event monitoring.
- Development of internal simulations in cybersecurity and support for the internship report.

MILITARY EXPERIENCE

- **Tactical Operator - Air Police | Portuguese Air Force, Lisbon | June 2017 - June 2024**
- Participation in security missions and defence of military facilities, aircraft, infrastructure and military personnel.
- Execution of operational and protection missions within the Portuguese Armed Forces.
- Support in training new personnel in tactical shooting, self-defence and security procedures.
- Experience working under pressure, coordinating teams and operating in high-responsibility environments.
- Awarded 3 commendations by senior leadership, including generals and colonels, for high-level performance.
- Received a letter of appreciation for a 4-month operational mission on Porto Santo Island, providing security in coordination with several security forces.
- Participated in a NATO joint mission with armed forces from several countries, in a multinational and coordinated environment.

EDUCATION

- TeSP - Cybersecurity and Computer Networks: higher professional technical training in networks, systems, virtualization, secure services and information security.
- 12th grade - Science and Technology: secondary education completed in Science and Technology.
- Military training and courses: ICCS, Air Police Tactical Operator Course, defensive and off-road driving, Cybersecure Citizen and Expandable Baton Course.

ACADEMIC PROJECTS

- Active Directory and Centralized Management: AD DS, domains, OUs, users, groups, GPOs, DHCP, DNS, permissions, service accounts, auditing and PowerShell automation.
- Secure and Virtualized Infrastructure: Ubuntu Server, OPNsense, BIND DNS, Apache HTTPS, Postfix, Dovecot, SSH, SSL/TLS, ACLs, backups, logs, Nagios and Fail2Ban.
- Cisco, VMware and Infrastructure Labs: IPv4/IPv6, VLANs, 802.1Q trunking, Layer 2/3 switching, Inter-VLAN Routing, OSPFv2, Cisco, VMware ESXi, vSphere, vCenter and P2V.

BUSINESS PROJECTS

- Internal Phishing Awareness Campaign: controlled phishing simulation using Kali Linux, GoPhish, Apache, Gmail SMTP, Microsoft Admin Center rules, internal DNS, MKCert, Apache SSL and GPO certificate distribution.
- Security Assessment and Vulnerability Analysis: controlled penetration tests, footprinting, network reconnaissance, service enumeration, evidence collection and technical reporting with mitigation recommendations.
- Virtual SOC Lab for Business Implementation at DRTMoldes: home-based SOC lab aligned with NIS2 concepts, using Wazuh as SIEM for log centralization, Linux endpoint monitoring, Syscheck and authentication events; Suricata as NIDS with eve.json, ET Open rules and Wazuh correlation; TheHive for incident management through Wazuh alerts, Python integration and REST API; and Shuffle as SOAR in Docker with webhooks and API keys for incident automation. Testing included Nmap scans, monitored file changes and failed logins, with troubleshooting of Suricata rules, Docker/OpenSearch port conflicts and Linux service integration.

TECHNICAL SKILLS

- Technical profiles: SysAdmin, IT Support, infrastructure, advanced helpdesk, Windows Server Administrator and Junior Cybersecurity / Blue Team.
- Networks and infrastructure: TCP/IP, IPv4/IPv6, VLANs, 802.1Q trunking, switching, routing, OSPFv2, segmentation, Cisco and troubleshooting.
- Systems: Windows Server, Active Directory, GPO, DHCP, DNS, permissions, auditing, PowerShell, Ubuntu Server, Apache, BIND, Postfix, Dovecot, SSH, HTTPS, Fail2Ban, logs, backups and hardening.
- Virtualization: VMware ESXi, vSphere, vCenter, Workstation Pro, VirtualBox, Proxmox, snapshots, datastores, vSwitch and P2V.
- Cybersecurity and tools: pentesting, vulnerability analysis, GoPhish, phishing awareness, SOC, Wazuh, Suricata, TheHive, Shuffle, NIS2 concepts, risk mitigation, monitoring, auditing, OPNsense, Nagios, Nmap, Nessus, Nikto, Burp Suite, Microsoft 365 Admin Center and Active Directory.
- Programming, web and support: HTML5, CSS3, PHP, MySQL, C, Perl, PowerShell scripts, Python integrations, hardware maintenance, user support and incident resolution.

PERSONAL SKILLS

- Teamwork, adaptability, responsibility, discipline, organization, work under pressure, fast learning, versatility and dynamic attitude.
